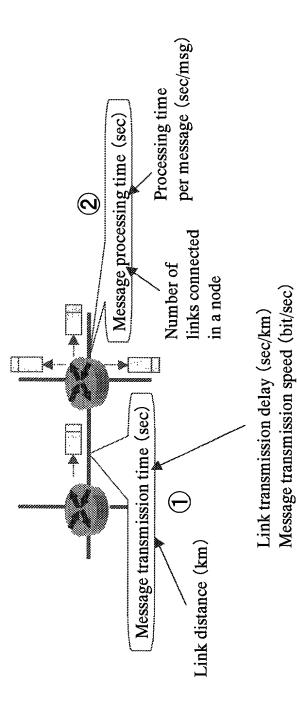

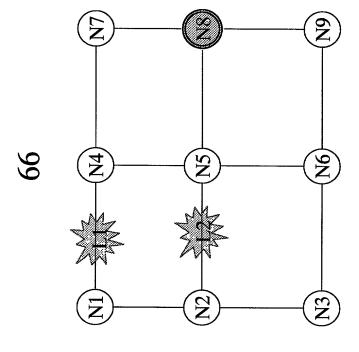

FIG. 10

Restoration time investigation table related to node 'N8'

Failure Iocation 61	Failure detection node 62	Restoration time upper limit (ms) 63	Reception time of failure notification message (ms) 64	Route switchover time (ms) 65
Link L1	N1	50	8.75	41.25
(N1,N4)	N4	50	4.50	45.50
Link L2	N2	20	3.25	46.75
(N2,N5)	N5	95	10.0	40.00
Link L3	# #	50	•	

FIG. 11

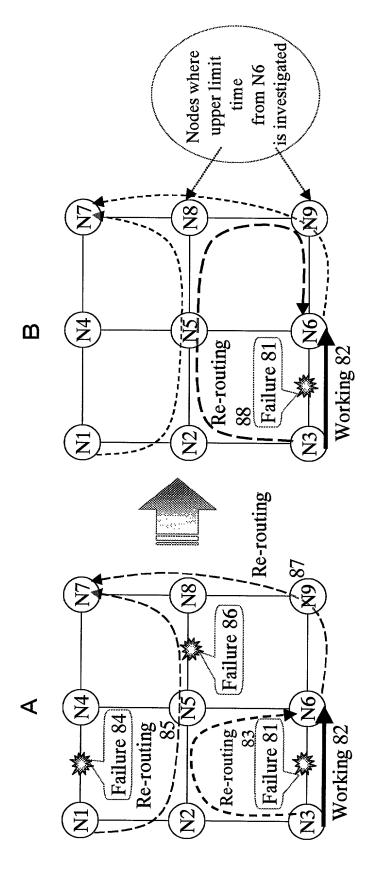

FIG. 13

mation table	Protecting communication route 74	Path141	Path411, Path412	Path171	Path241, Path242,	Path251	Path521, Path522	• • •	-
tion route infor	Damaged reception node 73	N4	N1	N7	N4	N5	N2	•••	
Protecting communication route information table	Damaged transmission node 72	N1	N4	N1	N2	 N2	N5	•••	•
Protecti	Failure location 71	Link L1	(N1,N4)			Link L2	(N2,N5)		Link L3 ···

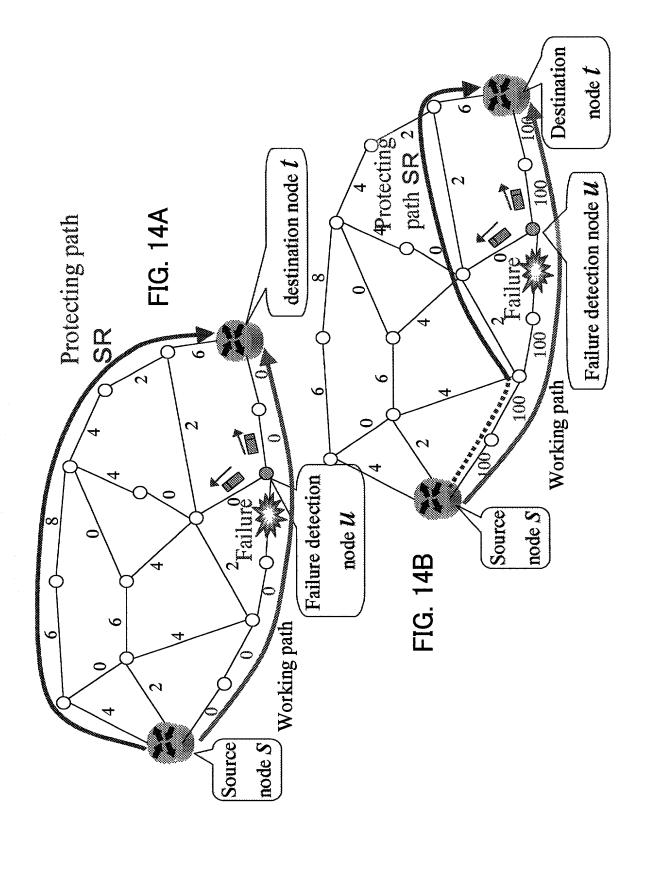

FIG. 15

Network scale	North	Path length approx.
	Metropolitan area	Metropolitan Path length approx. area
Switchover system	Optical	Approx. 5.0e-3 sec
	Electric	Approx. 5.0e-9 sec
Message processing capability in a node	86,	Approx. 1.0e-3 sec
(CPU capability)	,01	Approx. 1.0e-4 sec

\*Optical communication delay of 4.833e-6 sec/km is constantly fixed.

Fig. 16

		Network scale	
/		North America   Metropolitan (large)	Metropolitan area (small)
		(_ــــــــــــــــــــــــــــــــــــ	(
Switchover system	Optical		Communication delay neglected
	Electric	Switchover time neglected	

FIG. 17

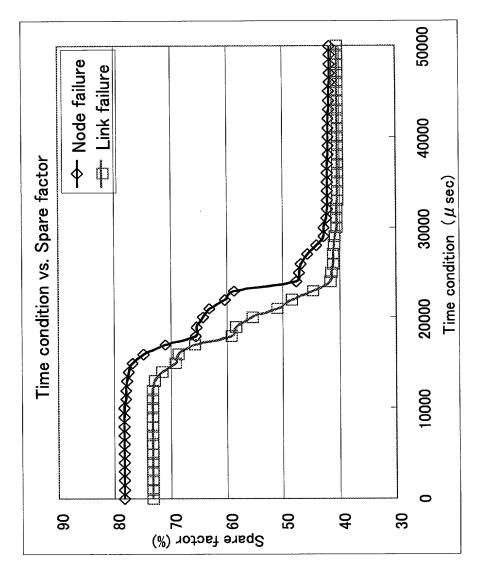

FIG. 18

	Spare factor	Average notification time	Maximum notification time
Time limit existent	41.5	18.767	24.7
Time limit non-existent	38.0	21.836	37.1
